

To Whom it may concern, I, as an American citizen believe in freedom of speech. Satellite radio gives an individual like myself the ability to hear what I want when I want it. I believe that through American ingenuity and the pursuit of happiness satellite radio like XM have started a new market place as well as filled a commercial need. I can now listen to traffic conditions when I need it as well music and comedy radio.

I realize that I am late entering this comment to the FCC, but I felt it was worth writing. Please, enter my opinion as greatly in favor of satellite radio.

Sincerely,

Francis X. Meehan
